What is it?

Main Features

- A meditation app that helps guide the user through a timed meditation session
- Chosen mantra text would display on the screen for the user
- Ability to choose from preselected mantras or input your own
- Help menu
- Settings menu
- Tutorial Screen

Project Progression/Time goals

- Slow start
  - Most of us busy with other class projects
  - Fell behind on the beginning goals of learning Flutter
- Progress started picking up
  - Made up for lost time during the early stages of development
  - Learned Flutter, began work on the main app
- Finished Strong
  - Met our final time goals for delivering the project and having a demo ready
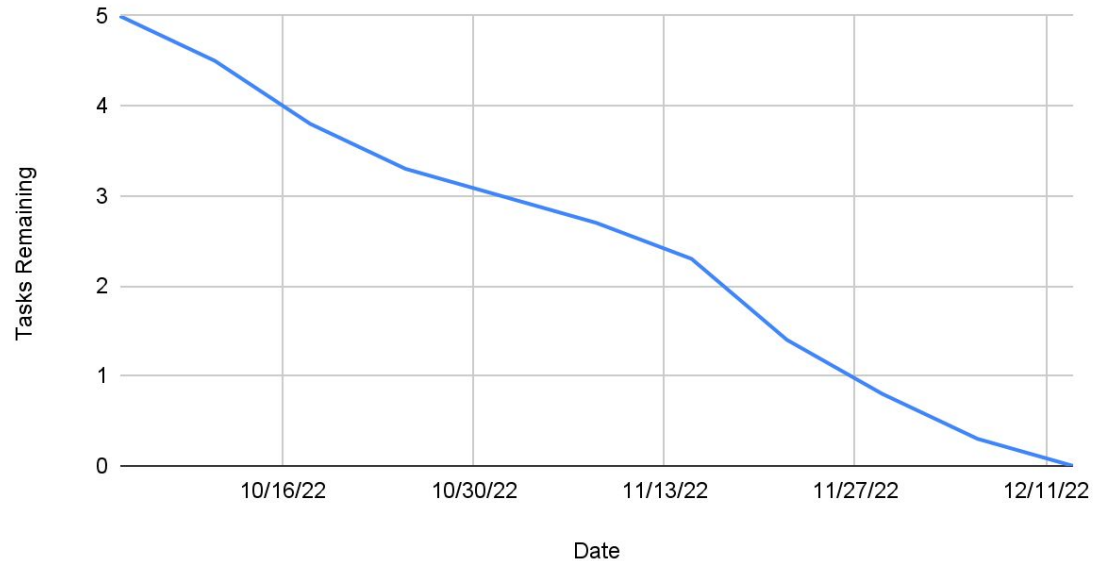

What's Changed?

A LOT!

Biggest Changes

- Over 1000 lines of code
- Fully functional settings popup
- User can customize the app completely to make it their own
  - Background image, UI Color, chime tone, mantra text
- Timer Countdown for meditation session
  - Can be set to custom time
